Tarot Card

As we grow up new generations rise yet a bit different faces but what we see that the same characteristics are repeated again and again..

In fact this is very apt if we say that Tarot cards are originated from those symbols which are connected to universe in which all religions and cultures exists

The tarot is a deck of cards which originated over 500 years ago..so origin of tarot cards is itself a birth of divine energy for all us in the universe .

Tarot cards helps u in problems related to finance , love , business , family matters and solving any other which is still unsolved..

There are end numbers of ways in which tarot cards reading can do u a benefit.... Just try a reading and see how beautiful it can work for u and your life.

Past Life Regression

Were you a King or a Queen in a past life? Or did you, in one of your earlier existences, suffer a spear injury that has returned to haunt you in the form of a mysterious pain that won't go away? Or do you have an irrational phobia that has no visible causes? Or maybe the first time you picked up a guitar you just knew how to hit the right notes, without ever learning music formally?

The answers to the above questions just might lie in some of your past lifetimes and here is a chance now for you to experience your multi-dimensional Soul, through this therapy.

Who we are today is the sum total of our 'past', which not only includes our past from the present lifetime but also from all our previous lifetimes as well. The memories and impressions, of each and every moment of our past, are stored in our subconscious mind which shapes our personality. Hence, any unresolved issues from our past-lives create physical, emotional, mental, and spiritual blocks.

Past Life Regression makes it possible for us to experience and review our forgotten lifetimes and identify the causes for these blocks which exist in our current lifetime, thereby enabling us to heal these blocked energies and unhealed traumas. Therapy is quick, effective and full of awareness when one understands the context of one's life limiting patterns from the perspective of an unhealed Past Life.

Past Life Regression works on the principle of cause and effect and helps in clearing up the effects by addressing the root causes. By going to a root cause and understanding how it has affected the present, profound natural healing takes place automatically. According to this principle, when the effect is forced back to the cause, the effect vanishes. Past Life Regression works simultaneously on Body, Mind, Emotions, and Spirit. This therapy heals at all levels.
